

Daanuu for parcels delivery

Discover Daanuu in 2 minutes !

Daanuu is not a field service provider.

Daanuu is a cloud software solution with a mobile app.

Daanuu is fully created and coded by seasoned engineers in Europe.

Daanuu is the first Automated Transport Management Software, Daanuu has added a A to TMS

What is Daanuu's Core business ?

Daanuu's mission is to build the transport management solution to make parcel delivery only a few clicks away. **If you're dreaming about it, we can even switch your environment up to "full automation mode".**

Daanuu changes the experience of managing a fleet of field worker for items delivery. Daanuu offers one single dashboard to the field managers and just one mobile app to the delivery driver. The manager and the field workers are connected in real time and Daanuu takes care to assign delivery orders and to optimise continuously their route.

As Daanuu is the software solution to build new services. Customer can monitor and even order directly in your environment via our client portal. With Daanuu delivery companies get the tools they need to stay in competition with tech giants.

Build a new customer relationship

Innovation because your customer is expecting it

Daanuu is the software solution to shift towards the on-demand economy not only in the consumers world but also in B2B. Your clients are expecting innovation, transparency and speed. Since your customer is able to switch rapidly to another company, delivery companies have to react and find tools to provide access to the tasks status, proof of deliveries and price.

KNOW YOUR CUSTOMER - Monitor customer satisfaction. Your valuable data that you collect or that you generate during the delivery process are available and you can monitor them in real time.

LET THE SOFTWARE ANTICIPATE AND SOLUTION - Many actions can be taken very early in the delivery process. Daanuu offers many ways to anticipate problems or to solve them almost with no human interaction needed.

A new experience in logistics software

Fast, Effortless, Multibusiness

Working in the on-demand economy is pretty challenging, your collaborators needs to react instantly to various kind of situation. To do so powerful tools have to be simple to use, we try at Daanuu to hide the complexity and build straight forward user interfaces. But since every company is working slightly differently, we've built a multi-business solution that is able with our setup to cover without any development.

SHARE INFORMATION - Connect Daanuu to your Warehouse management system or directly to your customer relationship management solution. You will expand the benefits of using Daanuu because your information is trustable, secured and available in real time.
